PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in web development, product analysis, and UI/UX design through freelance work and personal projects, plus leadership experience managing teams, operations, and customer-facing initiatives. Strong foundation in Java, JavaScript, Python, React, HTML, CSS, and Firebase, with a record of translating client requirements into functional, user-focused solutions.

EDUCATION

Bachelor of Science in Software Engineering (Java Track)

Western Governors University | GPA: 4.0

Expected Spring 2030

Salt Lake City, Utah

WORK EXPERIENCE

Product Analyst

Sept 2026 – Present

SYNK

Remote

- Evaluated a developing 3D virtual-world platform through hands-on testing of user workflows, navigation, and functionality
- Identified usability, engagement, and communication improvements and delivered prioritized, actionable recommendations
- Reviewed product iterations and documented findings for stakeholders to support ongoing platform refinement

Team Lead

Sept 2026 – Present

Walmart

Aurora, Illinois

- Lead daily operations across the Front End, Maintenance, and Asset Protection departments, supporting 30 to 50 associates weekly
- Direct and coordinate teams of up to 35 associates per shift, balancing staffing levels, customer demand, and operational priorities
- Oversee cash-handling procedures, register accountability, and self-checkout operations, enforcing financial controls to keep tills accurate and secure
- Resolve escalated customer and operational issues on the spot, keeping service standards high while minimizing disruption to the floor
- Drive team performance through clear communication, problem-solving, and day-to-day coaching and delegation across departments

Freelance Web Developer

Feb 2024 – Present

Digital Marc

Remote

- Designed and developed responsive websites for clients in the travel, telecommunications, and construction industries using HTML, CSS, JavaScript, React, and Figma, including a travel agency site showcasing 6+ travel packages
- Collaborated directly with clients to gather requirements, present progress updates, and implement feedback across multiple design iterations
- Incorporated feedback from 5+ test users to improve usability, navigation, and mobile responsiveness
- Contributed to 5 new client acquisitions and a 20% increase in closed deals, based on client-reported results

Store Manager

Mar 2020 – Jul 2024

Minisuper Sagrado Corazón

San Julián, Jalisco, Mexico

- Managed all daily store operations, including inventory management, purchasing, customer service, and supplier coordination
- Oversaw stock control processes to keep products available and operations efficient, tracking inventory levels and deciding what and when to reorder
- Implemented process improvements that reduced product shortages and increased the store's organizational effectiveness
- Built strong leadership, financial management, and customer relationship skills through direct, hands-on oversight of the business

PROJECTS

Job Tracking Application

July 2026 – Present

React | JavaScript | Firebase | HTML | CSS

- Built a web app that centralizes job applications, interview statuses, and deadlines in one dashboard, with Firebase Authentication and a cloud database for secure access and real-time data
- Reduced manual tracking effort by an estimated 50% during user testing by automating data collection through Gmail integration
- Presented the application to the Google Developer Groups (GDG) community, demonstrating its architecture, Firebase backend, and workflow automation

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, HTML5, CSS3

Frameworks: React

Backend & Databases: Firebase, Firebase Authentication, Firestore

Tools & Design: Git, GitHub, Visual Studio Code, PyCharm, Figma

Additional Skills: Product Analysis, Team Leadership, Client Collaboration, Project Management, Customer Service, English & Spanish (Fluent)
